## Twenty Bushels of Wheat to the Acre

In spite of the dry year in this district, some of our good farmers are threshing out fairly good crops. Mr. W. H. Bowman, who is farming about twelve miles north of Chinook, was in town on Friday after they had threshed, and in conversation with the Advance, stated that two hundred acres of wheat grown on summer fallow went twenty bushels to the acre. Mr. Bowman goes in for dry farming extensively and as a result has been very successful.

In the Heathdale district, Mr. John Allen has sixty acres of wheat which he believes will average twenty bushels to the acre.

Mr. R. Witt, who lives close to town, is another farmer who has yet to have an absolute crop failure. During these dry years Mr. Witt has always had a paying crop, and this year his wheat averaged 12 bushels to the acre.

We do not know just what methods these farmers adopt, but it is quite evident, that under their system they get good results, and their experience shows that with careful study in the working of the land wonderful results can be obtained in spite of dry years.

## Four New Municipal Hospitals

Four new municipal hospitals will be added to the Alberta list. A ten bed hospital is to be built at Viking, the cost of which will be in the neighborhood of about \$30,000. A two story brick structure, with ten beds, will be ready for use in November at Provost. The hospital at High River is of a larger type, with a minimum capacity of eighteen beds, while the hospital at Hanna, which will be completed by the end of the year, will have twenty-two beds. The High River and Hanna hospitals will cost \$55,000 each.

## Personalities

Miss Helen Lensegraf, who has been visiting friends at Killam for the last six weeks, returned on Friday.

Mr. S. Nicholson left Sunday morning for Lethbridge, where he will teach in a rural school.

Miss Mildred Hamon, of Hanna, was a visitor in town over the week-end.

Quite a number of the local sports spent Labor Day duck shooting.

Track laying has been started on the C.N.R. line northeast of Melville, in the Carrot river Valley, Sask.

Call at the Service Garage and see the Graphite Penetrating Oil. Just the thing for your car or machine.

Mrs. Rattray, of Killam, and Mrs. A. E. Lindsay, of Morrin, are visiting at the home of Mr. and Mrs. Lensegraf.

Mr. M. A. Jordan left Friday for Vancouver where he will spend a vacation.

Messrs. J. R. Miller, M. E. Bird and Hugh Mitchell went out shooting on Monday to Cut Bank Lake and bagged over thirty ducks.

Miss S. Lund returned Friday from a two weeks vacation.

Friends will be pleased to learn that Mrs. S. H. Smith, who has been on the sick list for the past two weeks, is progressing very favorably and is now convalescent.

Mr. J. McLeod, Union Bank accountant, is spending a holiday at Okotoks.

Born—To Mr. and Mrs. J. W. Yake, on Wednesday, Sept. 7, a daughter.

Chinook District School Fair will be held Friday, Sept. 23.

Mr. and Mrs. C. Pollock left this morning for their summer vacation. Mr. J. Murphy, of Calgary, will be night operator at the station while Mr. Pollock is on his holidays.

## England's Traditions

In a young and new country like Canada, and especially when the population is of a most cosmopolitan character, a regular polyglot of language and races, there is apt to develop a feeling akin to contempt for the historical past and those traditions of older lands which have been handed down from generation to generation and become woven into and a part of the national character. There is liable to be an impatience with all that savors of precedent and a scorn of reliance upon long tried principles and policies which have brought the race to where it is today, enlarged its freedom and protected its liberties.

Granted that it would be a mistake for any new country to supinely rely upon and slavishly follow in the footsteps of older lands and their historical past; admitting that only by new departures, by blazing new trails, by a courageous initiative, can there be progress—it is none the less true that in the forward march the safe, the prudent course is to retain a strong anchor in the past; to press onward, not by the adoption of revolutionary methods, but through wise evolution, profiting by the mistakes and lessons of the past, but inspired by the glorious traditions and achievements of our forefathers and guided by their ripened experience and wisdom.

What made England the bulwark of the Allied cause throughout the long drawn out years of the Great War? Why was it that Germany feared England more than all her other enemies combined? And why is it that in these trying first years of peace in a world turned topsy turvy it is to England the whole world looks to carry the major portion of the world's burden and work out the world's salvation.

It is not that the men and women of the English race are so much more clever than those of other races; it is not that they are, taken as a whole, intellectually superior; it is not that they are gifted above all other peoples. No, it is not because of these things. But it is because there is grounded in the people of England—not merely those now living within the confines of England, but in all parts of the world—the great traditions of England, the inspiration of England's literature, the lives, the words, the deeds of England's great men. It is such traditions as that established by England's sailors, "Women and children first," and "the captain was the last to leave the sinking ship," that has maintained untarnished England's mercantile service and made her naval supremacy no threat to the world. "England never knows when she is beaten," impatiently declared one of her greatest enemies in a bygone age, and that tradition remained with the soldiers and sailors of Greater England throughout the Great War, even in the darkest days, impelling them on to such victory from the very jaws of defeat.

Strong, stern, implacable in battle, England is ever chivalrous toward a brave but defeated foe. An Englishman admires a good fighter and is the first to admit his good qualities, whether it be on the battlefield or the field of sport. English sport the world over is a synonym for "clean." "Play fair" has become a national characteristic.

Down through the centuries England, while tenacious of her own rights and privileges, has frankly recognized the rights and privileges of others. Even when an autocratic sovereign has on occasion done wrong and persisted in it, the real heart of England has opposed that wrong. In a word it is a tradition of England to be just, and even those who condemn some of her policies in past centuries must, in truth, realize that in those less enlightened years England was in advance of other countries, plodding on toward a brighter, better day.

From these traditions there has grown and developed a strong national character, a national pride, a high sense of national honor. When England gives her word, all nations recognize that she will keep it. Belgium relied upon the word of England in 1914, and did not rely in vain. Germany, alone, failed to realize that England's pledges are made to be kept and not treated as scraps of paper. Only recently, during the world-wide discussion of the question of renewal of the Anglo-Japanese Treaty, Lloyd George again uttered all critics when, after pointing out how Japan had faithfully fulfilled her obligations during the Great War and made possible England's great effort in France without the handicap of guarding the Pacific, he asked: "Shall England, having accepted this assistance when it was so urgently needed, turn round and refuse to maintain the mutual obligation now that England does not require it?" Englishmen emphatically answered, no.

England's traditions are the source of England's strength and England's greatness. They are the warp and woof of the national character. Within them in these days of world upheaval England and the British Empire might easily be rent asunder and go down in the oblivion of other great empires of the past. No country can truly call itself a nation until it has achieved great traditions. Despite all the horror, suffering and loss of the Great War, it has at last conferred this benefit on Canada that it has given our people one great tradition, one that will live forever and will leave an indelible impression on all future generations of Canadians.

### Accredited Herds

Sixty Thousand Dollars a Month Has Been Spent in This Work.

Since September, 1919, the "accredited herd" plan has been partly in operation in the Dominion. The system originated among breeders in the United States who had recognized for a long time the serious inroads which tuberculosis had been making in their herds and in 1917 the Federal Government adopted their suggestions. There are in Canada at present about 17 dairy accredited herds, that is, herds which have undergone the three semi-annual tuberculin tests and have been proved disease free. Their distribution among the provinces is significant. British Columbia has 7, Ontario, Manitoba and Saskatchewan 2 each, and Quebec has 4. For the last three months an expenditure at the rate of \$60,000 a month has been made on this head, but it is understood that owing to the general financial stringency, the work cannot be continued at this rate.

### CASTORIA

For Infants and Children In Use For Over 30 Years

Always bears the Signature of J. C. H. Watson

### Rye In Drought Areas

Expected There Will Be One Million Acres Sown in Rye This Year.

M. A. Brown, of the Western Canada Colonization Association, who has returned from a tour of Southern Saskatchewan and Alberta, where he took part in the campaign for increased fall rye acreage in the drought areas, stated that it is expected there will be one million acres sown in rye this year. Fully 30 per cent. of the farmers in these districts will seed a portion of their land to this crop. Results of farmers who have tried rye are all in favor of the crop for the drought areas, he said.

### Fish In Abundance.

Abundance of fish is reported from all points on the southern portion of the Labrador coast and numerous schooners are returning to Newfoundland ports with full cargoes. It is also anticipated that the bank fishery on the west coast of Newfoundland will be the best for many years.

By making your purchases from your home merchant you are contributing direct to the prosperity of the community in which you live.

The Spaniards consider Tuesday an unlucky day for marriages.

### Fighting Grasshoppers

Tremendous Amount of Material Used in Waging War Against Plague.

The fight against the grasshoppers for 1921 has been finished in Saskatchewan, but a still greater battle over a larger area is in sight for next year, according to officials of the department of agriculture. The total amount of materials mixed into poison this summer is staggering and include 3,024 tons of bran; 100 carloads of sulphur; 361,233 pounds of arsenic; 10,100 pounds of paris green; 92,360 gallons of molasses; 895 barrels of salt.

### You May Have Kidney Trouble and Not Know It

If your back aches and you suffer from dragging pains, it is an evidence your kidneys may not be acting just right. What you need is a course with Dr. Hamilton's Pills. They contain both Mandrake and Butternut and act very beneficially upon the liver and kidneys. "I was bothered a great deal with my kidneys, but got quick relief from Dr. Hamilton's Pills. My trouble manifested itself by pain in the back and by constant headache. I quickly recovered after using a few boxes of Dr. Hamilton's Pills. They brought me health, strength and vigor." Sold everywhere, 25c. or The Catarthozone Co., Montreal.

### New Gallipoli Incident Told

An Interesting Bit of War History Concerning the Evacuation.

Lord Northcliffe recently revealed an interesting bit of war history concerning the evacuation of Gallipoli. The hero of the story was Keith Murdoch, an Australian journalist, who is returning home to become editor of the Melbourne Herald, and the occasion of the telling of it was a luncheon given to Murdoch by the Times.

"It is an open secret," said Lord Northcliffe in proposing Mr. Murdoch's health, "that it was by his initiative that the Australians and the rest were removed from Gallipoli. Coming to Europe for the first time he took to Gallipoli peninsula and for the first time the truth was revealed.

"He brought a despatch, a very terrible despatch which I believe was intended to be sent to Australia. It showed that the troops to be evacuated that the time which would be spent in carrying that ghastly record to the Antipodes could be better used for the purpose of immediate action.

"I asked him to take it to Lloyd George and one of the finest pieces of work the Prime Minister did in the war was to circulate this document to the whole cabinet, which then constituted twenty persons. As a result of Keith Murdoch's dispatch immediate action was taken and that terrible story was concluded."

Ever induced Adam to eat, but he took to drink of his own accord.

### GOOD HEALTH CAN BE YOURS

If Your Blood Supply Is Kept Rich and Red.

It is a waste of time and money to fight merely the signs of disease; the long-run you are probably worse off than when you started. What is more important is that you should intelligently examine the various symptoms and trace the cause. When you remove the cause, health will be yours. For example, anemic people often endure months of suffering while treating its symptoms, such as indigestion, shortness of breath, palpitation of the heart and exhaustion after any small effort.

The apparent stomach and heart troubles are generally nothing more than the result of an insufficient supply of pure blood. This anemic state may have followed some previous illness, or an attack of influenza or it may have arisen from overwork, worry or too little fresh air. To obtain health the simple and proper course is to build up the blood, but to do this you must select a reliable remedy with a reputation such as Dr. Williams' Pink Pills. These pills enrich the blood which carries nourishment to all the organs of the body and enables them to do the work nature expects of them. Thousands of men and women have proved this for themselves. One of these is Mrs. T. J. Ryan, R.R. No. 1, Ertsville, Ont., who says: "Last spring I got into a badly run down condition. I had no energy; work left me exhausted, and my exertion would make my heart palpitate violently. I had often read of Dr. Williams' Pink Pills and decided to give them a trial and got a half dozen boxes. I had not been taking the pills long when I felt a decided improvement in my condition and by the time I had used the six boxes I could do my housework with ease. I can strongly recommend Dr. Williams' Pink Pills to all weak people."

You can get these pills through any dealer in medicine, or by mail post paid at 50 cents a box or by check for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

### To Make Cool Drinks

BY LORETTO C. LYNCH

An Acknowledged Expert in All Matters Pertaining to Household Management.

Since prohibition, clever folks are concocting satisfying drinks for summer porch serving. And the writer has endeavored to collect the recipes of the more attractive ones.

Here is one called blackberry fizz. A quart of blackberries is stewed in just a little water until soft and broken. These are strained and sweetened and then bottled or canned for future use, if the juice is not to be used at once. To make the drink pour one-third of a glass of blackberry syrup into a chilled glass. Add a tablespoon of lemon juice and some crushed ice. Then fill the glass to the top with ginger ale.

Fruit punch is sometimes found flat and lacking in flavor, while it may contain choice ingredients. This may be overcome by the addition of a little orange pekoe tea infusion. A rounding tablespoon of tea steeped in a quart of boiling water for five minutes is a desirable addition to the average gallon of punch.

Here are the proportions for a punch to serve twenty-five with probably two cups of punch each: To the juice of twenty oranges and twelve lemons, add a pound of granulated sugar and boil five minutes. Cool and then add the contents of one No. 10 can of grated pineapple.

Add a quart of cold tea infusion and three quarts of either plain water or Apollinaris. The punch should be thoroughly chilled before serving. It may be necessary to add more sugar. Marshmallow cherries may be added without their juice. The latter will change the color.

Of course there are always unexpected guests dropping in during the summer days, and it is well to keep the orange-lemon syrup on hand in a preserving jar in the refrigerator. Use twenty oranges and twelve lemons with a pound of sugar. Half or quarter of this may be boiled into a syrup.

With the syrup on hand, it takes but a moment to add the still or sparkling water once the syrup is in the glass.

Small cans of sliced pineapple and a jar or two of marshmallow cherries may be kept on hand for special occasions. A bit of pineapple and a couple of cherries make a real festive drink out of an otherwise commonplace drink.

Iced tea, iced coffee and iced cocoa will ever be summer drink favorites. To be at their best they must be properly made and attractively served.

Tea should be freshly made—steeped in boiling water for four minutes. The best results seem to come from pouring hot tea over ice into the serving glass.

Lemon is usually used with iced tea. The lemon should be thinly sliced. Powdered sugar is added.

Iced coffee likewise is made from fresh hot coffee poured over enough ice to both cool and chill it. Iced cocoa may be allowed to cool before it is chilled by ice. Whipped cream is served with both iced coffee and iced cocoa.

The shops are having some beautiful glasses for the serving of these summer drinks. Long glass spoons in color are quite the fad and add to the attractiveness of any porch drink.

Ask for Minard's and take no other

### Dust Storms At Sea

Vessels Many Miles Out Impeded By Violent Dust Storm.

The Santa Rosalia, a merchant vessel belonging to the United States sent in three successive reports to the weather bureau of the United States Department of Agriculture on its trip from Karatsu, Japan, to Tokyo, China, and thence to Shanghai, en route to Port Townsend. Accompanying its May report was a small envelope full of a fine, yellowish gray dust gathered up from the decks where it had fallen.

A note on the subject explained that the air was so full of the dust that sailing was hazardous, owing to impaired visibility. This was April 13, in latitude 37 degrees 25 minutes north, longitude 122 degrees 50 minutes east, a point of the Yellow Sea near Port Arthur on the peninsula now called Chosen, formerly Korea.

Investigation revealed that the same week there had been a violent continental cyclone or dust storm many miles to the north in Mongolia, in the border of Siberia. Corroboration of the fact that quantities of this dust sufficient to impede vessels could be blown as far south as the East China and Yellow Seas was interesting to scientific workers all over the world.

## It Certainly Delivers The Goods, Declares Manitoba Merchant

"Tanlac has made such a big change in me that I feel like an entirely different man," said Chas. W. Cohen, well-known business man, residing at Stockdale, Man.

"The medicine has put me on my feet in the very best of health, and I am only too glad to give it my highest endorsement. For three years I was in very bad health and didn't know what it was to feel right. Everything I ate seemed to sour in my stomach and I had an uncomfortable bloated up feeling that lasted for hours at a time.

"I couldn't sleep soundly, could scarcely eat a thing, was going down

rapidly in weight and my work was just a drag to me. I was nervous and restless, scarcely had any strength or energy, and, in fact, wasn't myself at all.

"When I read the statement of a man who had gotten rid of troubles like mine by taking Tanlac, I decided to try it myself. Well, six bottles have fixed me up so fine that I eat good and hearty of just everything I want now, and never feel a sign of distress. I have regained all my lost weight and strength and can say for Tanlac that it certainly delivers the goods."

Tanlac is sold by leading druggists everywhere.

### Earth Collided With Comet

Planet Believed to Have Passed Through Comet's Tail on August 8th.

Announcement is made at the Koenigstuhl Observatory in Heidelberg, Germany, that the earth passed through the tail of a comet on the night of August 8.

At sunset on August 7, a bright object was observed near the sun by W. Campbell, director of Lick Observatory, which is located near San Jose, California. Five persons saw the celestial object, and reports from the observatory indicated that experts there believed it might be the nucleus of a bright comet. It would appear probable that this identification was correct, in view of the foregoing report from Germany.

### The Change.

To some women a man is considered a possibility for a time. After that he becomes a curiosity.—Lowa Fritol.

Asthma Doesn't Wear Off Alone. Do not make the mistake of waiting for asthma to wear away by itself. While you are waiting the disease is surely gathering a stronger foothold and you live in danger of stronger attacks. Dr. J. D. Kellogg's Asthma Remedy taken early, will prevent incipient condition from becoming chronic and saves hours of suffering.

### Home Bread Making

Suggestions as to Requirements to Secure the Best Results.

Bread-making is an art not nearly so extensively practiced in the household as in bygone days. In urban districts it is so little practiced that home-made bread has come to be regarded as a luxury. The reason is not far to seek. Trouble is avoided, and professional bakers turn out an article of good quality generally, and at a price little in excess of what the cost would be if made by the housewife or the cook. And then the baker has facilities that the housekeeper has not. For instance, one of the main difficulties encountered when bread is being made in the home is the lack of a place where the dough can be kept at suitable and even temperature throughout the whole period of fermentation. Relative to this fact, Dr. C. E. Saunders, the Dominion Cerealists, in a bulletin recently issued at Ottawa on "Wheat, Flour and Bread," says that where bread is made very often it would be advisable to construct a special fermenting box, or cupboard, where the temperature can be maintained at between 80 and 90 degrees. Once the process of fermentation has started the dough must not be allowed to become either chilled or overheated. A little butter, lard or other shortening reduces the toughness without detracting from the flavor. Sugar should be used in great moderation. Dr. Saunders goes fully into the subject and quotes methods that he recommends for home bread-making, which he says is undoubtedly cheaper than the product of the bakeries, particularly in the winter, when no special fire has to be made.

Be fair to your local merchants. Ask to see his goods and compare prices before sending your money to the mail order houses. You will find that it pays.

A man may be a complete master of himself and yet have nothing to boast of.

Although eggs of different species of birds, greatly differ in shape, the yolks of all are invariably spherical.

Those who marry for money can afford to repent at leisure.

Minard's Liniment Lumberman's Friend

### Flies and Colds

The House Fly Seems to Have Cold Preference.

If you want to make your room attractive to flies, paper it in bright yellow. They like that color best. They do not seem to care about blue, green or orange, one way or the other. Red they markedly dislike.

House flies are most intimate companions and everything that can be learned about them is worth knowing. Their color preferences have been ascertained by recent elaborate experiments.

### Catarrhal Conditions

Catarrh is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the blood to the Mucous Surfaces of the System. HALL'S CATARRH MEDICINE gives the system strength by improving the general health and assists Nature in doing its work. All Druggists. Circular free. E. J. Cheney & Co., Toledo, Ohio.

Memorial to British Heroism.

Lieutenant-Colonel Hunter Weston, who was recently delegated to investigate, has recommended that the British memorial at Gallipoli be erected on an eminence five hundred yards northeast of the Hell's Lighthouse. This site will overlook the scene of one of the most memorable exploits of the British ship Clyde in the gallant endeavor to land troops.

### England and France.

The world as we see it now is not a world in which France and England can afford to quarrel over minor matters, still less on any personal grounds. And if our statesmen fail by their words and acts to cement the union so deeply thought out by the people, they will be sharply reminded by the peoples who suffered together to establish peace and freedom that they have failed in their trust.—London Times.

No man or woman should hobble painfully about because of corns when so certain a relief is at hand as Holway's Corn Remover.

Some schools of mackerel are half a mile wide and twenty miles long and are estimated to contain one million barrels of fish.

One British military cemetery in France, just outside Boulogne, contains nearly 12,000 graves.

## SHE TOOK HER MOTHER'S ADVICE

Now is in the Best of Health because she took Lydia E. Pinkham's Vegetable Compound

Kessock, Sask.—"My mother has taken Lydia E. Pinkham's Vegetable Compound and upon learning of my troubles advised me to try it. As I seemed all run down after the flu and had low-corrhea very bad, I have taken Lydia E. Pinkham's Vegetable Compound and used the Sarsaparilla and Dr. Brown's Capsules and Prescription and am much better in every way. I am willing for you to use my letter as a testimonial as I recommend your medicines."—Mrs. JENNE NELSON, Kessock, Sask.

It is not always in business that a woman is forced to give up her work on account of ill health. It is quite as often the woman who does her own work at home. When backaches and headaches drive out all ambition, when that bearing-down sensation attacks you when you are nervous and blue, the one great help for such ailments is Lydia E. Pinkham's Vegetable Compound.

## Belfast Is Now The Storm Centre In Irish Political War

Belfast.—Although the truce between the discordant factions is being completely observed throughout the remainder of Ireland, Belfast is experiencing a period of terror from gunmen and snipers.

The Ulster cabinet met to consider the serious condition prevailing here. Military officials and police authorities joined in the discussions. Arrangements were made to draft additional troops for the protection of the city, and other steps were taken to restore and maintain order.

London.—The grave disturbances in Belfast which have come in the midst of the most delicate possible peace negotiations with Ireland were occupying the attention of the entire English press. Some correspondents of London newspapers in Belfast designate the present trouble as purely religious and it is certain that this element enters into the conflict to a more or less degree as always has been the case in Ulster politics. King George, in reply to an address from the convocation of Canterbury, says: "Let us thank God that some measure of response has been vouchsafed to my appeal by my Irish people. With full heart I pray that their reconciliation may be consummated by the deliberations now proceeding and that they may be united in making a new era for their native land."

### Must Hold Their Grain

Mennonites Ordered to Await Outcome of Injunction Proceedings.

Regina, Sask.—Mennonite communities in Saskatchewan, whose hands are involved in litigation as the result of the big deal for the purchase of large Mennonite holdings by an American syndicate, will be unable to dispose of their 1921 crop until the pending laws have been determined. This is the result of an application before Mr. Justice MacKay in the court of King's Bench, by Bram Thomson, for an injunction restraining the Mennonites or anyone else from selling crops now being harvested. The application was granted.

It is estimated that a million bushels of grain will be held up as a result of the order.

### For Cheaper Coal

Discuss Plan to Operate Briquette Plant at Balfair.

Ottawa.—Arrangements for the opening and operation of the Government briquetting plant at Balfair, Sask., are expected to be completed during the visit to Ottawa of Premier Martin and Hon. C. Dunning, of Saskatchewan.

The plant was built at a cost of \$680,000 for the purpose of manufacturing the low grade lignite coals of Southern Manitoba and Saskatchewan into briquettes for household use. Work at the plant will commence as soon as operating plans are arranged between the governments.

### Panama Traffic.

Washington.—During the seven years of commercial operation of the Panama Canal ending August 14 last, 13,416 commercial vessels made the transit through the isthmus, according to the records. The aggregate tonnage of these vessels were 46,889,942 and their cargo totalled 51,578,920 tons of 2,240 pounds.

## International Court Of Justice Promises Well

Speculation Ripe as to Probable Choice of the Council and Assembly.

Geneva.—By a resolution adopted by the council of the League of Nations, that body will assume control of stipulations in the treaties with Hungary and Rumania regarding the reports of minorities in the territories which changed their sovereignty.

Chief interest in the work of the council centres for the moment upon the international court of justice, which is regarded as promising better results than any other section of the league thus far. Speculation has begun as to the probable choice by the council and assembly of the eleven judges from among about one hundred names thus far submitted.

Canada has submitted the names of Sir Robert Borden and Rt. Hon. J. C. Doherty, minister of justice, for consideration by the league.

### Wireless For North Country

Plan Commercial Wireless Between Edmonton and Fort Norman.

Edmonton, Alta.—Edmonton and all the outside world is soon to have direct wireless communication with Fort Norman and Fort Smith, as well as other northern points, according to the plans of a local firm, who have just been granted a federal license for the operation of commercial wireless between these points.

The Edmonton firm is being backed by other local men who are interested in the project.

Bert L. Perry, who is promoting the scheme for his firm, says that work will be started at once on the Edmonton station, which will be located outside the city limits, away from the city power plants and other sources of electrical energy.

Marconi equipment will be used, and wireless operators will be brought from the coast. It is expected to have the system in full operation by the early spring.

With the installation of wireless upon the northern steamers, a continuous system of wireless will be available through the north.

### Proposed Wheat Pool

Will Consider Action Regarding Proposals at Meeting in Winnipeg.

Winnipeg.—A meeting of the Canadian Council of Agriculture will be held here October 15. The special committee on wheat marketing will meet two days prior to the opening of the general meeting to consider what action is to be taken on the proposed wheat pool. The advisability of carrying on with the plans now made or cancellation of all plans will be discussed, and a report made to the general meeting.

The status of the Canada Grain Act will also be under consideration, it was stated.

### Takes Over Street Car Line.

Toronto.—After sixty years of private control, the last history under the Toronto Railway Company, the city's street car system came back into the city's position at midnight Aug. 31st, the franchise having expired. It will in future be under the management of the recently appointed transportation committee.

### Reward Still Open.

Toronto.—A reward of \$30,000 cash for the whereabouts of Ambrose J. Small, missing Toronto theatre owner—alive, or \$15,000 for his body—will be continued, according to a local afternoon newspaper.

### Sign Hungary Treaty.

Budapest.—The treaty of peace between the United States and Hungary were signed recently by Foreign Minister Hanfy, and Ernest Smith, United States commissioner here.

### Smuts in Cape Town.

London.—A Reuter's cable from Cape Town, South Africa, reports the arrival there of General Smuts, premier of the South African Union, who received an enthusiastic reception.

### Von Buelow Dead.

Berlin.—Field Marshal General von Buelow, who was commander-in-chief of the German second army during the war, died here.

### Consider Freight Rates Reduction

Ottawa.—Reductions in freight rates were under consideration at a private conference between the Board of Railway Commissioners and representatives of the Canadian Pacific, the Grand Trunk and the Canadian National Railways. Hon. F. B. Carvell, chairman of the Board of Railway Commissioners, has expressed the view that something must be done to meet the present situation and it is hoped that some immediate action will be taken as a result of the conference. In support of a reduction in freight rates, the view is taken that falling wages and cheaper materials have reduced operating costs.

### Turk Losses Heavy

Making Counter-Attacks to Arrest Advance of Greeks.

Athens.—Reports that Greek troops engaged in the offensive against the Turkish Nationalists in Asia Minor have suffered a reverse are denied in an official statement issued here. It is declared, however, that the battle along the Sakaria River is continuing with violence.

Towns along the southern coast of the Black Sea have been bombarded by Greek warships, the statement says.

Newspaper despatches from the front state the Turkish Nationalists are making continuous counter-attacks, arresting the advance of the Greeks. The enemy is bringing new reserves to the front to take the place of troops killed or wounded in the fighting, it being said that the Turkish losses are heavy.

### Getting After Drug Smugglers

Seaplanes Found to be Invaluable in Watching for Offenders.

Ottawa.—Air patrols have been instrumental in frustrating to a large extent at least, the efforts of smugglers to land huge quantities of drugs illegally on the Pacific Coast, according to reports reaching Air Board officials from the customs department at Vancouver, where seaplanes have been placed at the disposal of the customs officers in their fight against the dope smugglers.

In a recent patrol, a longshoreman was arrested while trying to smuggle ashore \$15,000 worth of opium from one of the vessels travelling between Canada and the Orient. The circumvention of drug smugglers is a game which keeps the customs officials on the watch, as new landing places are tried almost for every shipment and it has been found that the seaplanes is the only method of transportation speedy enough to enable the customs department to meet the situation.

### Want Membership of Five Million.

Atlantic City, N.J.—A campaign of the American Federation of Labor for a membership of five million will be launched the federation's executive council announced.

The campaign has been ordered by the council because of the recent slump in membership of the federation due to unemployment. The present membership is given at 3,906,526, as compared with 4,078,740 in 1920.

### Makes Plea For Unemployed.

Toronto.—A plea for work for unemployed returned soldiers was made by Lord Byng of Vinny, Governor-General of Canada, when he addressed the Canadian Club at a luncheon tendered in his honor. The event brought together many of the important figures in the army, ecclesiastical, social and business life of Eastern Canada.

### Italian Ship in Serious Condition.

Naples.—The situation arising from the retention of the steamship Pocahontas in port here since June 8, because of failure to pay for repairs, has become serious because the ship has aboard only five days' rations for its 28 passengers and 253 members of the crew.

### Fire Destroys B.C. Plant.

Nanaimo, B.C.—Fire completely destroyed the plant of the Nanaimo Fish, Meal and Oil Refining Company causing a loss estimated at nearly \$50,000 on which there was \$20,000 insurance.

### Royal Chaplain Dies.

London.—Rev. Canon Edgar Sheppard, Royal chaplain at Windsor Castle for many years is dead, aged 76. He was chaplain to Queen Victoria later to King Edward, the Queen Alexandra, and to the present Royal family.

### WESTERN EDITORS

T. G. McKinnell, publisher of the Conrier, Crystal City, Man.

### Indian Disturbances Subsidging

London.—A Reuter cable from Simla, India, reports that the "dropish disturbances in some districts are subsiding and a favorable turn to the situation is expected shortly. Public-spirited Hindu Christian civilians are taking a hand by beating off the rebels as they appear. This is due to the belief, which is confirmed by local newspapers, that the rising is directed, not merely against the Government, but against all non-Moslems.

### Loans For Stock Raisers

Bank to Aid Cattlemen Over Times of Low Prices.

Ottawa.—Canadian cattle raisers will be carried over the period of abnormally low prices by advances from the banks secured by their stock. This announcement was made by Hon. S. F. Tominie, minister of agriculture.

By arrangement between the Government and the Canadian Bankers' Association, any cattle raiser who asks for a loan and has security in cattle, will be given an advance to obtain fodder. Cattle raisers will thus be enabled to carry their stock instead of getting rid of it at sacrifice prices.

Dr. Tominie stated that the banks will loan all that the cattle are worth, and that every effort will be made to carry the raisers through. Special consideration will be given to the period of the loans in order to assist the cattlemen to weather the storm. It is understood that there is no specific limit placed on the total amount which the banks may advance under the arrangement with the Government.

### Printers Resort to Prayer.

Toronto.—Printers of Local 91, International Typographical Union, who have been on strike nearly three months for the 44-hour week, offered up prayers in the labor temple for the success of their fight, according to the Toronto Globe, which adds: "It was the first time a trade union turned to prayer in its fight with employers, and it is doubtful if such a scene was ever witnessed in the labor temple before."

### Spanish Aviators Exploring Morocco.

Madrid.—Spanish aviators, operating with the forces opposing rebel Moors, are conducting extensive exploration of the plains and mountains in the troubled district. In northeastern Morocco, says an official statement issued here. Hostilities between the Spanish and Moors appear to have died down as the statement declared nothing new had occurred.

### Pay Insurance For Auto Fatalities.

New York.—An estimate of \$4,500,000 was paid by life insurance companies of the continent in death claims from automobile fatalities during 1920, is published by the Insurance Press. The figures are quoted to show that during the year the automobile caused 12,000 fatalities and a million other injuries.

### Demand Race Equality.

London.—Absolute race equality, political and social, as a foundation for advancement is the claim set forth in a manifesto to the world by the Pan-African congress now in session here. Various peoples of African descent in the United States, the West Indies, Central and South America and Africa are represented.

The congress will meet again in Brussels or Paris in September.

There are 12,000,000 negroes in the United States.

## Steamboating On Saskatchewan River In The Late Seventies

By O.-G.-MAS-ES (Little Clerg.)

(Copyright)

He was to go in his cabin and remain there, hand the boat over to me, with authority. Failing him doing this, I would return and report. He at once marched me round to the mate and steward and gave orders to this effect and disappeared. I walked on shore very leisurely and busied myself shaking hands with the malcontents. I told them the latest news and generally had a good gossip. Finally I say: "Boys, it is dry talking, and I want a lunch." So I yelled, "Steward," at the top of my voice. Then to him I said: "You see my friends here, we are hungry, get your waiters busy and serve us up a first class lunch, and do it quick!" This was done at once and a merry scene followed. Jokes were made against the Big-Knives (Yankees), and broad witciness of all kinds flew from mouth to mouth. One huge Indian called "Sha-ke-mace" (Mosquito) was the strongest man on board, and evidently a ringleader in the strike. We had all lit our pipes, when I issued a challenge to Sha-ke-mace. We would divide the men, tossing up for first choice, and I bet him two sacks of flour to one that my gang could outwork him in a given space of time. The challenge was accepted and though night had come, it made no difference, as there were plenty of flares. Never was freight unloaded and the boat wooded in quicker time. As all the dialogue had been carried on in Cree it was quite a mystery to the officers of the ship, but I passed the buck to the chief engineer to start at once. I then visited the old man in the cabin and advised him to keep out of the way as much as possible until the men's anger had cooled down. So away they went, I returning to the Rapids at a much more leisurely gait than when we came up.

Poor old Captain W., an able steamboat man, but when trouble of any kind arose he became wild with excitement and his language was unwholesome. The Northcote made the Forks of the Saskatchewan all right but there was not water enough to ascend the Coy's Falls, so the freight was unloaded there and hauled up a mile. Prince Albert, a distance of about 50 miles.

A Runaway Car at Grand Rapids, Portage. Three and a half miles of steel rails crossed the Portage, the height of land was about midway, and a down grade between these both ways. Small flat cars carrying from three to four tons were used, and mules were the motive power. Hauling up from the lake level to the start of the down grade, the mule's single tree was hooked, the car ran on by its own weight, and the mule trotted behind, the driver regulating the speed by a chain brake. The brake chains were old and in poor shape, though new ones had been ordered but never supplied. Sitting at dinner one day at the fine residence at the upper end of the Portage, with a number of passengers waiting for a steamer up the river, a thundering noise was heard. I dashed out, and there, round the bend, came a heavily loaded car at a

furiously speed. In charge was a very black French half-breed, with his hair flying in the wind, twisting the brakes with all his might. But the chain had broken, so his efforts were fruitless. There was a neat gravel walk from the track right up to our front door, and a poor Beattie came to this and noted the big warehouse doors were round beyond, he gave a wild glance round, and, noting me, jumped the car, and slid right up the gravel walk, his feet hitting the step hard. He was half unconscious with the excitement and shock, and on examination I found his legs and stern full of gravel pellets, which, as there was no resident doctor, I extracted with a pocket knife, using a log for an operating table.

The car hit some loose freight on the track and dashed through the doors of the warehouse. This fortunately was piled up with flour at that end, so this acted as a buffer and the damage was not extensive. On reopening the master, new chains were promptly supplied, so there was some good came out of the accident. Mr. Mule had quietly trotted back to his stable at the lower end.

### Retribution

It was rather righteous retribution on this man, as some time before this when he had a lot of loose freight piled under tarpaulins at the lower end of the Portage, I caught him with both hands down to the elbows in a big firkin of butter. The time was about midnight, and his intention evidently was to pull the butter out and fill up the firkin with rubbish, so that it would not check short. I well remember it was fitting moonlight and the expressions on his face would have made a good picture. One was murderous, then fear, and so on. Firkin and all, I marched him round to a leather tapper where we slept, woke up the men, had his hands tied behind his back, and set a guard over him until morning. He kept begging and praying me for silence and forgiveness. I phoned the chief (for one of our best mechanics has made a telephone which actually worked, with empty cans and wire), to come over, which he did in the morning. We gave the culprit a summary trial; deferred sentence was the verdict, and a careful watch was to be kept on him throughout the summer.

While between his groans I was extracting the gravel and then using a strong mixture of carbolic acid, which no doubt smarted considerably, I reminded him of his fall from honesty and said no doubt the accident happened to him as a special punishment for his crime. For some time after this he slept on his face, much to the amusement of his comrades.

Like the car transport, steamboating on the Saskatchewan had its day, and was gradually replaced by rail, the Canadian Pacific railway traversing the prairie and the DuAppelle and Long Lake running up to Prince Albert.

The Hudson's Bay Company, with their far-seeing vision, had sold out part of their interests in 1883 to a transportation company, retaining, however, the right of first shipments over all comers.

## War Officially Ended August 31st

Order-in-Council Was Approved By King George.

London.—The King held a Privy Council at Buckingham Palace for the disposal of many matters of business affecting various Government departments.

His Majesty approved an Order-in-Council with respect to the date at which the European war is officially ended. This order provided for the official termination of the war at midnight on August 31, and to be of general application except in regard to the Ottoman Empire.

This matter, although formal, is of very considerable importance, because many matters of national interest are dependent upon the date at which the war is declared to be at an end.

### Population of Scotland Increases.

London.—The preliminary report of the Scottish census just issued shows that the population of Scotland has increased considerably since the last census was taken in 1911. The population is given as 4,882,000, including 2,348,000 males and 2,534,000 females, the gross total representing an increase of 121,000 over 1911.

Patronize your local merchant and thereby help to build up your home town and community.

## Conference Interests China

China's Participation in Conference On Disarmament to Be Held in Washington.

Peking.—Interest in China's participation in the conference on disarmament and Far Eastern questions to be held in Washington, is shown by the formation of a number of associations pledged to support this country's cause at the conference. A large number of prominent Chinese have been enrolled in these organizations since the Peking Government accepted President Harding's invitation to send a delegation to the United States capital. The constitutional party of Chekiang Province has issued a call to other provinces to send representatives to Shanghai for a discussion of the Washington conference.

### Want Exchange on Official Basis.

London.—The British Board of Education are advocating that the exchange of teachers between the various parts of the Empire should be established on regular official basis. Herbert New Zealand is the only Dominion whose Government has given the project direct official support.

### Compliments Lloyd George.

London.—Before leaving Edinburgh for Blairholm, Premier Lloyd George was complimented by a reporter on the fine example he had given the citizens by attending church twice on Sunday.

## Distributing Immigrants

Settlers in Canada

A family group of settlers in Canada.

Two thousand immigrants have arrived in a single day at the port of Quebec. They have landed from three Canadian Pacific Ocean Liners; they have been inspected, examined and docketed by officials and inspectors—governmental and railway; their foreign money has been exchanged for Canadian currency; what remains is the process of distribution and assimilation?

Two thousand crowd the Government Immigration Hall, waiting to make another leg of their long journey. They have come from Everywhere and are going to Everywhere. The map of Europe and of the British Isles are represented in this mass of humanity—sturdy Scandinavians from Northern Europe, dairy workers from Denmark, Poles by the group and family, fleeing from their war-torn country; all the new Little Lands created by the League of Nations have contributed of their sons, as all the Central European countries in Ukrainian, Lithuanian, Czech, Slovak and Russian. Switzerland and Italy are also represented in the composite crowd, all making a human inflow of a day that illustrates

the mixture of races in this land of promise. Another shipload follows those of the Corvina and Tenuis. The Melita brings an exclusively British army of immigrants, the latter covering the British Isles as the foreigners do Europe, while all the way from John O'Groats to the Land's End is heard from.

The Government is through with them and the Canadian Pacific Railway practically takes charge. Both unite in directing the big crowds to their respective trains. Long lines of cars—tourist, colonist and coaches—parallel the Hall, each clean and well-cared for their occupation. Big jangling locomotives are ready for their task. A large staff of officials and train men are on their job, keeping their heads as well as their hands under strong temptation to see both. Some of the newcomers are nervous and frightened, some are excited and fussy, and some are 'feckless' in the word of a Scotch observer. Perhaps we would be, too, if we were in their place, a long way from home and not quite sure of tomorrow. Carefully and cleverly the pas-

sengers are stowed away—the westward-bound in trains that will head direct for Winnipeg and all beyond to the going down of the sun; the Ontario ones are in trains bound to Toronto, for redistribution from that centre. Families are given cars to themselves, women folks are treated the same, and the single men have other cars to themselves, flocking together like birds of a feather. Many groups formed during the voyage and that have the same destination, are also permitted to keep intact.

The women-filled cars are in charge of trained Government "conductors" who render a sympathetic service in a hundred ways; not only travelling women and girls are appreciated, especially where babies are present, as they are more numerous. Thus train after train is filled, but not more than to capacity, and started—a new experience in a new land for a majority of them. All as Quebec city is crowded, and the old Province is entered, the largest in all Canada, passing the quaint farmsteads of the habitants, all eyes are centred on the landscape and the New World.—F. V.

Comfort

fuller measure of toothsome food; no game better meets the requirements of the busy man who enjoys a few days out each year, and who has neither the time nor the resources to indulge in more expensive and exacting hunting.

More ducks than usual on the ponds and lakes are reported. There are more of the larger species than have been seen for many years, railway agents along the Canadian National lines declare. Along the larger lakes and rivers, where shooting lodges are chiefly located, the chances for good wing shooting are excellent. Young ducks are more mature than usual this season and will bag up fast in weight.

Each year there are many persons making their first shoot and most of them are not familiar with game laws. There are also many of the old shots who can profit by reading carefully the game laws. All sportsmen should secure a copy of the game laws of every province he proposes entering so as to be familiar with the game that he is legally hunted.

Transportation companies are making preparations for the conveyance of large parties to the hunting grounds in various provinces. As in former years, the more profitable hunt of the ducks is to be found in districts served by the Canadian National Railways and the following places in Alberta include the more popular shooting grounds where not for many years has the wild been in such abundance. In nearly all cases guides are not required.

Alberta: Ashmont, Beiseker, Big Valley, Chipman, Clyde, Craigmyle, Chinook, Ceral, Chauvin, Camrose, Delia, Donald, Drumheller, Delburne, Edgerton, Elnora, Excel, Edberg, Ferintosh, Fort Saskatchewan, Hanna, Huxley, Islay, Irma, Kitscoty, Kingman, Loyminster, Lamont, Manville Meeting Creek, Mundare, Morrin, Morrinville, Ryley, Ransbury, Sibbald, St. Albert, Stony Plains, St. Paul, Three Hills, Viking, Vermilion, Wabamun, Wainwright, Wayne and Warden.

WANTED—To purchase a good milk cow. Apply at the National Elevator, Chinook.

The Service Garage is selling plain casings 30 by 3 1-2 at 16.50 Non-Skids at 19.50 and Nobby Treads at 20.00. Other sizes of tires and tubes at proportionate prices.

WANTED—To rent section of land 3 quarters under cultivation and at least 150 acres summer fallow. Must have full outfit farm machinery and horses. Apply Chinook Advance Office.

## Prepare for Cold Weather this Winter

That next winter will be a cold one is the indication of weather data compiled by Dr. C. F. Brooks, associate professor of meteorology and climatology at Clark university. An analysis of the weather records of more than a century indicates that we are

# The Spirit Of The British Nation That Overcomes All Obstacles

The following gives a few extracts from an article written from London by W. C. Barron, and published in "Barron's" New York, under date of the 11th July, entitled "European Unsettlements".

Two years ago I declared that England was the great war sufferer, but that her people did not know it. I thought I saw pretty clearly what the demoralization in her coal mining forces and her future shipping profits and her transportation unsettlements would do to her national income. Now England is awake to the situation, but not fully so.

The sentiment of the people may be expressed thus as I quote from one returned from the occupations area in Germany: "We have won the war, and the first thing to find out is how much Germany can and will make her. We will drive right into Berlin with the French and take her coal fields and her industries and will make her know where she stands and what she has got to do. But if she cannot pay, we'll buckle down to it and pay up ourselves as best we can. We have no intention of repudiating any of our debts, including our indebtedness to the United States. We are going to see everything paid."

Few people are in position to take the financial latitude and longitude of this little life.

The government people had hoped this spring that the deficit would not exceed £100,000,000. Present prospects are that it will far exceed that for this fiscal year. It should be remembered, however, that every war nation consumes more than it earns and that war expenditure cannot be checked immediately after the close of the war.

This is not so serious a matter when only two or three nations are at war. Other nations have the resources and goods and can extend the war. The serious problem before the world today is to find the credit in the after-war reconstruction period. But the English people refuse always to recognize defeat, and they have always confidence in their national leadership, and in their "muddling through."

If one leader or set of leaders fail they know that others must come forward. As a nation the English people today stand confident and defiant. They won; they are English; and they will pay. That is their whole sentiment.

Their trust is in their race, their blood, their bulwarks of empire, and above all, they have a supreme faith in an ever-abiding and over-ruling Providence. They did right by themselves, their neighbors and their allies during the war. They will even see justice done today to the living and honest working people of Germany. They will continue to do their duty day by day, but they will not worry. They have defied the lightning of war, and they will face the lightning of finance as they have to. They will borrow and they will pay; but they will not, in advance, borrow any trouble.

## Match Making In Nelson

Soft White Pine of the Kootenays Found Suitable for Purpose.

Very apparently, the soft white pine of the Kootenays has recommended itself to the match-making industry as suitable material for matches. Following the recent announcement of steps being taken to start making matches at Nelson, a second industry, similar to but entirely independent of the first, has been launched at the inland city. This is a plant for turning out "match blocks" to be shipped east where various match factories will buy the material for turning out matches. It is said that by August 31 this second plant will be in operation at Nelson, giving employment to thirty to forty operatives. W. Powell, formerly of Spokane, W. W. Powell, formerly of Spokane, and he estimates that he will be shipping about a car a day of the product to the eastern market.

Just as the chin gives qualities to the face, so the thumb marks the personality of the hand, and is an unerring index of a man's natural strength or weakness of character.

Spend your money at home, thereby helping your own town and local merchants.

In the east, as a general rule, Turks wear yellow slippers, Armenians red, and Jews blue.

## Facts About Old London

Most Wonderful City Covers Area of 673 Miles.

Remarkable facts and figures revealing the immensity of London and the ramifications of its administration are given in the "Municipal Year Book" for 1922. There are really several Londons—all of them equally wonderful.

There is London, the administrative county (117 square miles) whose population (1911) was 4,522,961.

Then there is the Greater London of the police area. This goes as far as to Epsom. It contains 520 square miles and a population of 7,252,963. There is also the water London extending over an area of 538 square miles, a constituency represented by 105 members of Parliament.

London the City, is a mere 673 acres. When the City sleeps it has a population of 14,447 or thereabouts but when the City is awake its noon-day inhabitants total 360,000 plus a million entering within the boundaries every day.

## The Apple In Canada

Efforts to Secure New Varieties Adapted to Varying Climatic Conditions.

Apples being of prime importance to Canada, not alone owing to the wholesome domestic consumption but more because of the export value, special attention is paid to their culture at the experimental farms and fruit stations. At the central farm in Ottawa there is a large test orchard where varieties are compared and their relative merits studied. Carefully gathered information has been disseminated throughout the country as a result of these experiments. From time to time during the thirty-three years that this orchard has been established, winters have occurred which varieties were subject to severe weather conditions. The latest of these was in the winter of 1917-1918, when many trees were killed. The effects of that winter extended into 1919, when trees died that had been previously weakened.

In the last ten or more years there have not been confined to the central farm but have been added and confirmed by experiences at other farms and stations in different parts of the country. A number of new hardy varieties have been originated, prominent among these is the Melba, a seedling of the McIntosh. Efforts are also being made to obtain apples by cross-breeding that will prove of value to, and worthy of, cultivation in the prairie provinces. The wild Siberian crabapple is hardy and fruits well over a large part of the prairies. Crosses that have been made have also proved hardy and encouraged further experiments. The Experimental Station at Morden, Man., is specializing in horticulture and about forty acres have been planted in fruits. Some of the varieties show considerable promise at this station. It has been said, and said undoubtedly with a degree of truth, that an apple a day keeps the doctor away.

African Spider is a Paper Maker. The original papermaker is a spider. In the interior of Africa, that large spider building its home from fine paper of its own making, when it selects a smooth surface about two inches square, covering it with fine threads that are papery, placing its fifty eggs beneath, then spinning a thin border that pastes it down tight until the eggs hatch in three weeks.

## Canadian Bacon Exports

The value of bacon exports from Canada during 1920 was \$34,000,000. An active campaign is being conducted by the Federal Department of Agriculture in co-operation with the provincial departments to increase, and incidentally to maintain the quality of Canadian bacon, which years ago procured for it a steady market in Britain.

"Now, friends and comrades," said the street corner politician, after a long speech made in the pouring rain, "any questions?"

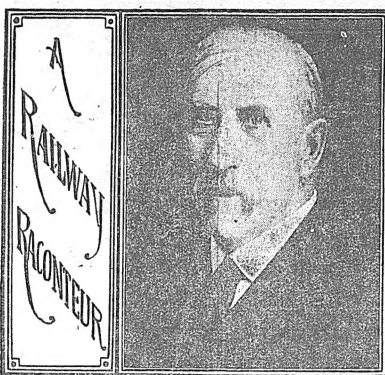

"Yes," piped all that remained of his audience, an urchin. "Can I have the box you're standing on to make a go-cart with?"—The Evening News (London).

It was a Roman custom to hang beads of red coral on the cradles of infants and round their necks "to preserve and fasten their teeth."

Give your local merchants a chance. Buy at home.

A town cannot grow without business. By helping your local dealer you assist the community.

Until the year 1874 the Japanese used to vaccinate on the tip of the nose.

George H. Ham

The birthdays of Mr. George H. Ham, of the C.P.R., have for many years past been observed by some function or other. If it was not a home-like dinner with a score or so of close friends, or a public banquet or a presentation, or an operation in a hospital, or a trip on a railway train, it was something else. This year a radical departure is being made from the ordinary August 23rd proceedings with the Musson Book Company of Toronto as sponsors for the innovation. On that day, this publishing company issued "Reminiscences of a 'Raconteur,'" the author of which is Mr. Ham. In the articles which originally appeared in Maclean's Magazine, the author recalls incidents of his busy and by no means monotonous life from the infantile age of three down to the present day. 'The allotted three score and ten of man is most interestingly covered. From his early boyhood days, he recounts events which include the Fenian Raids and the second Riel Rebellion, of chasing and being chased by wild Indians, of the bustling early days of Winnipeg, and the West, of the Governors-General he has met, of the intrepid officers of the Hudson's Bay Company, of the Mormons with whom he mingled accompanied by the Canadian Women's Press Club of which he is the only male member, and he writes entertainingly of banquets and banquets. He delves into the myster-

## The Dover Patrol

Gallant Company Kept the Bostern Gate Day and Night.

The Prince of Wales unveiled the Dover Patrol Memorial at Leathercock's Point, four miles east of Dover, and is one of those simple and yet moving speeches of which he possesses the secret bade us remember what we owed to the Dover Patrol. Truly to borrow Cromwell's ringing words, they were a gallant company. The Grand Fleet was Britain's main guard. The men of the Dover Patrol kept the Postern Gate by night and day, in tempest and in calm. It may not be technically exact to say that they never lost touch with the enemy, but if they did it was only by the strain of the sea and weather such as no human power could control. May the spirit that inspired them remain with us as long as the granite of the columns that record their deeds and those of their French comrades! The French Memorial Obelisk, on the opposite side of the Channel. In New York yet another "kindred and comely" obelisk has been dedicated to the Dover Patrol in memory of Americans who took part in that great and noble adventure. The salt waters that flow between divide only to join those who have a common heritage in the great deeds of the Dover Patrol—London Spectator.

## His Presence Not Desired.

Much feeling has been manifested at Ostend by reason of the impudence with which German officers who made themselves obnoxious to the townspeople during the occupation have now turned up to enjoy the pleasures of this resort, and there have been many unpleasant scenes, one rather arrogant German coming in for such unwelcome attention that he was requested by the authorities to leave the town within three hours.

Horses are gradually disappearing from the streets of Winnipeg, City Hall records show. The number in use now is 3,804, as against 4,758 in 1916.

A town cannot grow without business. By helping your local dealer you assist the community.

Until the year 1874 the Japanese used to vaccinate on the tip of the nose.

# Futility Of Physical Forces To Secure The Peace Of The World

## For Arctic Discovery

Amundsen Will Employ Two Airplanes and Will Take Wireless Equipment.

For the first time land machines will be employed in the Arctic regions this year when Captain Roald Amundsen embarks upon his fourth expedition to reach the extreme northerly point on the globe. Capt. Amundsen has announced that he will make an effort to realize his theory that, by freezing into ice in the proper currents he may drift into the vicinity of the Pole in his ship, the "Maud." He explained that his last attempt to reach the Pole had been frustrated through broken propellers. On the next occasion, however, he would be properly equipped in that direction. Additional equipment would be two airplanes and a complete wireless apparatus. The airplanes would be used extensively, he said, especially for necessary scouting work which would be impossible on foot or from the vessel. In this way he hoped to secure a very wide knowledge of the entire Arctic territory through which he will pass and to make valuable contributions to civilization on his return. The machines will have sleds instead of wheels.

## Old Roman Road Discovered

Composed of Flints and Was in Good Repair.

Discovery has been made in England of another old Roman road hitherto unknown. Workmen who were digging manholes on the Alton roads where the latter joins the roads to Bentley and Borden, near Farnham, Surrey, unearthed five feet below the surface, part of what appears to be an old Roman road that ran from London to Manchester. The road was in an excellent state of preservation, the surface layer being a foot in thickness and composed of flints. In order to penetrate the surface the workmen had to use drills and steel wedges. Research has demonstrated that not only the Romans used bituminous materials, including asphalt, but the ancient Sumerians, Persians, Babylonians, Greeks and Egyptians as well. The road discovered in England, according to engineers, was capable of carrying traffic heavier than any to which modern roads are now put.

## Doukhobors Burn Weapons

Saskatchewan Followers of Peter Veregin Destroy Firearms.

On Sunday, Aug. 21, a large number of Doukhobors gathered at Veregin, Sask., to make a huge bonfire of their firearms, including shot-guns and all sizes and makes of rifles. These weapons belonged to the Independent Doukhobors, for it is against the religion of Peter Veregin's community people to take the life of any living animal. The Independent Doukhobors, that is, those who have broken away from the community, have become naturalized Canadians, but for some time past many have shown their inclination to return to the fold of the community, or at least, to lead a similar life to the community people.

Consequently, after having been persuaded by the community, the Independent men decided to destroy all life-killing weapons, both as a demonstration of their peacefulness and as a protest against all things military. These men have recently organized a relief fund for assisting the starving families in Russia, for they claim to have first-hand information that the peasants in the old land under the Lenin-Trotsky regime are getting practically nothing to eat. They are, naturally, very much concerned, and are doing everything to raise money to assist their brothers in need, at the same time taking every precaution to ensure the relief reaching those it is intended for and not falling into the hands of the government of Russia.

## Yet the Man Moved Up.

"Will the gentleman please move forward a little?" called out the polite conductor of the trolley car as a dozen more passengers tried to scramble in.

"I won't!" growled one hard-faced man who clung to a strap near the door.

"Oh, I didn't ask you," said the conductor.—Youth's Companion.

Gatun Lake, a part of the Panama Canal system, is the largest man-made body of fresh water in the world.

Terrible as have been the sufferings of the great war and irreparable its losses, the price will not have proved too great if through this unspeakable tragedy the nations may discover a new principle of international fellowship and a higher way of life. The world is being taught, as never before in all its history, the futility of material incentives and the impotence of physical forces to secure peace and prosperity says the Presbyterian Witness. It is significant that a growing number of the world's statesmen and leaders are becoming impressed with this truth and are assuming the role of prophets and preachers of a new evangel. Among the most recent of these utterances are addresses by General Jan Christian Smuts and Vice-President Coolidge. Speaking recently before the Supreme Council in England, General Smuts said:

"I ask myself what will be the character of that history—will it be along the old lines, will it be the old spirit of national and imperial domination which has been the undoing of Europe, or shall we have learned our lesson, shall we have purged our souls in the fires through which we have passed? Will it be a future of peaceful co-operation, of friendly co-ordination of all the vast interests at stake? Shall we act in continuous friendly consultation, in the true spirit of a society of nations, or will there once more be a repetition of rival groups, of exclusive alliances, and finally of a terrible catastrophe more fatal than the one we have passed through? That, to my mind, is the alternative that is the parting of the ways at which we have arrived."

Referring to the Peace Treaty, General Smuts said:

"There is one chapter in that treaty which, to my mind, should be specially sacred to the British Empire. That is the first chapter of the League of Nations. The Covenant may be faulty, it may need amendment in order to make it more workable and more generally acceptable, but let us remember that the Covenant embodies the most deeply felt longings of the human race for a better life. There more than anywhere else do we find serious effort made to translate into practically reality the great ideals that actuated us during the war—ideals for which millions of our best gave their lives. A measure of understanding instead of the violence of force. The operation of consultation and conferences in all great difficulties, which we have found so fruitful in our empire system, is the method which the League attempts to apply to the affairs of the world. Let us in the British Empire back it for all it is worth. It may well prove a way out of the present morass. It may become the foundation of a new international system which will render armaments unnecessary and give the world at large the blessings which we enjoy in our lesser league of nations in the empire."

## Want Help For Jasper Highway

Premier Greenfield Would Make No Definite Promise Regarding Funds.

While the most thorough investigation and the most careful consideration will be given by the provincial government to the proposed project, Premier Greenfield told a large delegation of boosters for the Jasper highway to the coast, who met the Alberta cabinet, that no promise could be given as to how far the government would eventually go in the matter of providing funds.

In answering the delegation the premier pointed out that the new government is confronted with many serious problems at the present time, particularly with respect to the situation in the south.

"And I want to say that I sympathize with the southern settlers in their troubles, and one of the first things that this government must do is to try and find some solution for that problem," he said.

## Production of Canadian Apples.

According to Dominion Bureau of Statistics the commercial production of apples in Canada during 1920 was 3,404,340 barrels valued at \$29,849,149 compared with 3,334,000 barrels to the value of \$24,396,210 in 1919. The crop in 1920 an increase of 69,680 barrels in production and of \$5,452,939 in value.

Nearly a dozen important streets in London have no house numbered 13, evidently in deference to the popular superstition which regards that number as unlucky.

## Oh, Money! Money!

—BY—  
ELEANOR H. PORTER

Printed by Special Arrangements with The Allen, Toronto, Ont.

(Continued)

To Mr. Smith it was a matter of small moment whether Mr. Duff would come to him or not. He even indulged now and then in a bout of his own with the gentleman, chuckling innocently when results showed that he had picked his remark at just the right note of contrast to get what he wanted.

For the most part, however, Mr. Smith, at least nominally, spent his time at his legitimate task of studying and copying the Blaisdell family records, of which he was finding a great number. Rufus Blaisdell apparently had no little "digging" himself in his own day, and Mr. Smith told Miss Maggie that it was all a great "find" for him.

Miss Maggie seemed pleased. She said that she was glad if she could be of any help to him, and she told him to come whenever he liked. She arranged the Bible and the big box of papers on a little table in the corner and told him to make himself quite at home, and she showed plainly that she regarded him as quite one of the family, that Mr. Smith might be pardoned for soon considering himself so.

It was while at work in this corner that he came to learn so much of Miss Maggie's daily life, and of her visitors.

Although many of these visitors were strangers to him, some of them he knew.

One day it was Mrs. Hattie Blaisdell, with a countenance even more florid than usual. She was breathless and excited, and her eyes were worried. She was going to give a luncheon, she said. She wanted Miss Maggie's silver spoon, and her hand-painted sugar-and-cream, and Mother Blaisdell's cut-glass dish.

Mr. Smith, supposing that Miss Maggie herself was to be at the luncheon, was just rejoicing within him that she was to have this pleasant little outing when he heard Mrs. Blaisdell telling her to be sure to come at eleven to be in the kitchen, and asking whether Aunt Maggie would serve in the dining-room, and what should she do with Benny.

He'd have to be put somewhere, or else he'd be sure to upset everything. Mr. Smith did not hear Miss Maggie's answer to all this, for she hurried her visitor to the kitchen at once—to look up the spoons, she said.

But indirectly he obtained a very conclusive reply for he saw that Miss Maggie got one day when he came, and Benny, who was in her place, told him all about it, even to the dandy frosted cake Aunt Maggie had made for the company to eat.

Another day it was Mrs. Jane Blaisdell who came, with her face a tired brown between her brows and a despairing droop to her lips. She carried a large bundle which she dropped unceremoniously into Miss Maggie's lap.

"There, I'm dead beat, and I've brought it to you, just as I got to help me," she finished, sinking into a chair.

"Why, of course, if I can. But what is it?" Miss Maggie's deft fingers were already untangling the knot.

"It's my old black silk. I'm making it over."

"Again? But I thought the last time it couldn't be done again."

"Yes, I know; but there's lots of good in it yet," interposed Mrs. Jane decidedly; "and I've bought new velvet and new lace, and some buttons and a new lining. I thought I could do it alone, but I've reached a point where I just have to have help. So I came right over."

"Yes, of course, but"—Miss Maggie was lifting a half-finished sleeve doubtfully—"why didn't you go to Flora? She'd know exactly—"

## It Works Wonders On Colds, Catarrh, Bronchitis, Weak Throat

When your throat rattles, your lungs and chest are sore, your throat is sore, and you don't fear consumption—use Catarrhine and get well. It clears the throat, stops hacking, relieves tight chest and soreness in the throat tubes. To clear away Catarrh of the nose nothing could be better. Catarrhine is Nature's own remedy—it heals and soothes—removes every form of throat, lung and bronchial trouble. Prescribed by many specialists and used by thousands every day. Get the dollar outfit; it lasts two months. Small size, 50¢; trial size, 25¢; at all dealers or the Catarrhine Co., Montreal.

Mrs. Jane stiffened. "Because I can't afford to go to Flora? But I have to pay Flora, and you know it. If I had the money I should be glad to do it, of course. But I haven't, and charity begins at home, I think. Besides, I do go to her for new dresses. But this old thing!—Oh, course, if you don't want to help me—"

"Oh, but I do," plunged in Miss Maggie hurriedly. "Come out into the kitchen where I'll have more room," she exclaimed, gathering the bundle into her arms and springing to her feet.

"I've got some other lace at home—yards and yards. I get a lot, it's so cheap," recounted Mrs. Jane, rising from the corner of her mouth. Her step was alert and confident. She carried no bundle.

The kitchen door slammed sharply, and Mr. Smith heard no more. Half an hour later, however, he saw Mrs. Jane go down the walk. The frown was gone from her face and the droop from the corners of her mouth. Her step was alert and confident. She carried no bundle.

The next day it was Miss Flora. Miss Flora's thin lips looked more pinched than ever, and her eyes more anxious. Mr. Smith thought, "Even for a smile, she's acknowledged Mr. Smith's presence was so warm, wished she had tried to give it."

She sat down then, by the window, and began to chat with Miss Maggie and very soon Mr. Smith heard her say this:

"No, Maggie, I don't know, really, what I'm doing to you. Truly I don't. Business is so terrible! Why, I don't earn enough to pay my rent, now, nor yet 'nuthin' of my feed."

Miss Maggie frowned. "But I thought that Hattie—"

Hattie—she gave some new dresses—and a Bessie, too."

A sigh passed Miss Flora's lips. "Yes, oh, yes, they are having three or four more, and they're all mine. They've gone to that French woman that makes the Pennocks' things, and she's got a queer name. And of course it's all right, and you can't blame 'em, livin' on the West Side, as they do now."

As she said, as Mr. Smith heard her say this:

"Nonsense! Up to date, indeed!" (Miss Maggie laughed merrily, but Mr. Smith, copying data at the table, detected a note in the laugh that was not merriment.) "You're up to date for me. I've got just the job for you, too. Come out into the kitchen."

"She was already almost at the door."

"Why, Maggie, you haven't either!" (In spite of the incredulity of voice and manner, Miss Flora sprang joyfully to her feet.) "You never had the make up to it. Again the kitchen door slammed shut, and Mr. Smith was left to finish the sentence for himself."

But Mr. Smith was not finishing sentences. Neither was his face expressing just then the sympathy which it might be supposed to be for the woman who was so sorry a tale as Miss Flora had been telling. On the contrary, Mr. Smith, with an air of elation of countenance, was scribbling on the edge of his notebook words that certainly he had never found in the Blaisdell records before: "Two months more, then—a hundred thousand dollars. And may I be there to see it!"

Half an hour later, as on the previous day, Mr. Smith saw a metamorphosed woman hurrying down the little path to the street.

But not always, as Mr. Smith soon learned, were Miss Maggie's visitors women. Besides Benny, with his grievances, young Fred Blaisdell came sometimes, and poured into Miss Maggie's sympathetic ears the story of Guskie Pennock's really remarkable personality, or of what he was going to do when he went to college—and afterwards.

Mr. Jim Blaisdell drifted in quite frequently Sunday afternoons, though apparently all he came for was to smoke and read in one of the big comfortable chairs. Mr. Smith himself had fallen into the way of strolling down to Miss Maggie's almost every Sunday after dinner.

One Saturday afternoon Mr. Frank Blaisdell rattled up to the door in his grocery wagon. His face was very red, and his mother's whiskers were standing straight out at each side.

Jane had collapsed, he said, utterly collapsed. All the week she had been house-cleaning and doing up curtains; and now this morning, expressly against his wishes, to take him a man, she had put down the parlor carpet herself. Now she was flat on her back, and supper to be got for the boarder, and the Saturday baking yet to be done. And could Maggie come and help out?

Before Miss Maggie could answer, Mr. Smith hurried out from his corner and insisted that "the boarder" did not want any supper anyway—

and could they not live on crackers and milk for the coming few days?

But Miss Maggie laughed and said, "Nonsense!" And in an incredibly short time she was ready to drive back in the grocery wagon. Later, when he went home, Mr. Smith found her there, presiding over one of the best suppers he had eaten since his arrival in Hillerton. She came every day after that, for a week, for Mrs. Jane remained "flat on her back" seven days, with a doctor in daily attendance, supplemented by a trained nurse, presumably ordered by the same doctor from the nearest city.

Miss Maggie, with the assistance of Millicent, attended to the housework. But in spite of the excellence of the cuisine, meal time was a most unhappy period to everybody concerned, owing to the terrific comments of Mr. Frank Blaisdell as to how much his wife had "saved" by not having a man to put down that carpet.

Millicent had little time now to go walking or auto-riding with Carl Pennock. Her daily life was, indeed, more pleasure-starved than ever—all of which was not lost on Carl Pennock. Mr. Smith and Millicent were fast friends now. Given a man with a sympathetic understanding, on one side, and a girl hungry for that same sympathy and understanding, and it could hardly be otherwise. From Millicent's own lips Mr. Smith knew now just how hungry a young girl can be for fun and fun-brothers.

"Of course I've got my board and clothes, and I ought to be thankful for them," she stormed lovingly to him one day, and I'll thank you for them. But sometimes it seems as if I would be willing to go hungry for meat and potato, if for once—just once—I could buy a little more of candy, and eat it up all at once, if I wanted to! But now, why now I can't even treat a friend to an ice-cream soda without seeing mother's shocked, reproachful eyes over the rim of the glass?"

It was not easy then (for many times subsequently) for Mr. Smith to keep from asking Millicent the utterly absurd question of how many five-cent boxes of candy she supposed one hundred thousand dollars would buy. But he did keep from it—by her self-sacrifice and her confidence in her own good sense.

His recollection that she would know some day, if she cared to take the trouble to reckon it up.

## For the Next War

Grim Horrors Are Seen By Hudson Maxin, the Inventor.

Encouraged, apparently, by his success as a war prophet over a long period of years, the veteran inventor, Hudson Maxin, has contributed "A Forecast of the Next War" to the New York Tribune. As Maxin predicted the Russo-Japanese war and its outcome, the possibilities of aviation in warfare, the use of poisonous gas and smoke-bombs, his latest prophecies command respect, notwithstanding the shuddering nightmare presented by his picture of the "next world war."

In the next great war not only will the most deadly poisonous gases be spread broadcast over actual combatting forces, both on land and sea, but also over inland cities," says Mr. Maxin. "Not only will the actual fighters be attacked, but non-combatants also will be attacked. In the next great war we may look for the most disastrous and ear-rending results from the use of the airplane as a sower of death and destruction."

"Twenty years ago I predicted that the airplane, which is able to overtop all barriers, would place inland positions on the firing line. This was done to a large extent in the world wars, Paris and London were bombarded and, had the war continued a little longer, Berlin would have been wiped off the map and its inhabitants destroyed. Vickers Sons and Maxin had built enormous air-pisanes, capable of carrying tons of poisonous gases, and they were almost ready to begin the flight to Berlin for the destruction of that city when the armistice was signed."

"In the next great war we are going to see germs of the most deadly diseases sown broadcast by airplanes. We are going to see inland cities smothered in poisonous gases and tens of thousands of inhabitants, men, women and children, killed in a few minutes."

"Fleas and cooties or body lice will be infected with bubonic plague in tropical fever and other deadly ailments and sowed by billions over the inhabitants of enemy countries. Rats and mice will be infected with bubonic plague and let down from airplanes to spread contagion. There will be no place that one may hide himself and be safe from attack. All non-combatants will be exposed to destruction, as the snail, according to Revelation, are to be exposed on the Day of Judgment."

## London Bridge

Thousands of Motors Cross the Bridge Every Hour.

A thousand motor cars cross London Bridge every hour of the day; and along Oxford Street where two centuries ago positions were held up by highwaymen, six thousand motor buses pass every day—and would not stop if the curbs were lined with Dick Turpins, as one writer has observed. Over 5,000 cabs are available in the city; and 2,000 taxicabs on 68 services, thread their way through the maze of London's streets for 150 miles; while another 250 miles of streets are covered by 150 motor buses operating on 138 services. All of this traffic is within the county.

## Spills Silver and

Ties Up Traffic

Atlantic City Messenger Was Taking Deposit to Bank.

Street car traffic on Atlantic Avenue was tied up half an hour when Andrew Higbee, employed as a messenger by the Atlantic City Street Railway Company, alighted from a trolley to deposit the day's receipts in a bank. Higbee carried \$6,000 worth of coin in a bag, and the bottom fell out of the bag, paying the streets with silver. A corps of detectives was summoned to protect him during salvaging operations.

## Starts Bear Farm.

Will grow bears in captivity because a valuable adjunct to the fur industry? That is the question that a fox man of Salisbury, N.B., will attempt to solve. He has purchased a big female bear and his idea is that the fur of the animals will make a profitable investment although he hopes to make better money by the sale of the cubs for pets.

Women jump at conclusions and frequently hit; men reason things out logically and usually miss.

A condor can exist without food for forty days, and an eagle twenty days.

The longest average of life is in Norway.

About 60 per cent of the average human body is water.

## The All-Harvester Machine

Eliminating All Hand Labor in the Harvest Field.

At a recent agricultural exhibition in Great Britain there was exhibited an attachment to a harvester which forms the first step towards eliminating all hand labor in the harvest field apart from the mere driving of the machine. This attachment is intended for standing the sheaves up after the harvester has cut and bound them. The judges at the exhibition thought so well of it that they awarded the makers a silver medal.

## Wireless Telephones in North.

Construction of wireless telephone plants at N'wray House and The Pas is under way. Prof. R. C. Walsh, commissioner of Northern Manitoba, states that a contract has been signed for the apparatus, which will be installed at these two points and at the same time connect the intermediate points. "The system will be operating soon, it is understood."

An amethyst is quartz crystal stained with manganese. Opal is crystal of another variety, containing from 5 to 13 per cent of water.

In London today there are less than one-third as many evening newspapers published as there were 125 years ago.

In making its new "silver" coinage, Britain employed the surplus nickel casings used for bullets during the war.

## You Can Prevent 40 %

Annual Depreciation in Your Car, Truck or Tractor

by using a lubricant that will stop friction which is the great foe to gear life. Go into any repair shop and see the number of cars being repaired because of worn bearings. That is the trouble. The bearings are overhauled because some owners think that all lubricants are equally good. Repair men will tell you that half of their business results from imperfect lubrication.

## Whitmore's Gear Compositions

are not affected by changes of temperature. They are actively fluid in the coldest weather, and at extreme heat and at high speeds they constantly preserve an indestructible film on the bearings, preventing contact of metal to metal.

WHITMORE'S does not evaporate under extreme heat, the level is not reduced. Run it through a strainer and put it back in your car, truck or tractor. You can use it over and over again. One installation will last eighteen to twenty-four months where there is no leakage. Considered on a mileage basis no lubricant is so economical as Whitmore's.

OTHER LUBRICANTS MAY COST LESS PER POUND—THEY COST MORE PER MILE. Don't ask for a grease—ask for Whitmore's Auto Gear Protective Composition, manufactured by The Whitmore Manufacturing Co., Cleveland, Ohio.

## World Happenings Briefly Told

Lake Huron has the curious record of having more islands than any other lake.

The censor refuses to permit the cabling of extracts of articles printed in Madrid newspapers. The telephoning of news also is forbidden.

The death of Lieutenant-Governor Lionel H. Clarke at Toronto ended the second vacant lieutenant-governorship in Canada.

Normal Schools of Manitoba will provide six hundred teachers for the province at sessions to be held this fall. Four hundred, it is expected, will be given permanent certificates, and 200 will be given temporary licenses.

The all-Russian relief committee, formed recently with Maxim Gorky and representatives of various parties as members, has been dissolved, and the members will not go abroad in the interests of Russian famine relief, as had been anticipated.

A farmer in touch with the dairy industry, living near Brockville, expressed the opinion that the farmers of that section would not winter more than fifty per cent. of their present herds. He based his prediction on the shortage of hay.

Following a meeting of the German cabinet, President Ebert issued a decree prohibiting meetings, processions, demonstrations and the publication of periodicals and pamphlets likely to encourage seditious movements.

Convicts who dealt in spurious money before becoming inmates of Sing Sing prison have continued to ply their trade behind prison walls, it was learned when it developed that cheques totalling \$14,000 had been forged by prisoners assigned to office duty.

Operators in the alleged \$50,000,000 "swindle trust" arrested in Chicago have no connection with the Great West Bank of Canada, Winnipeg and Regina, it is stated here by Arthur Bannister, director of the General Bond Corporation, which is promoting the bank.

Final Agreement has been reached between the Manitoba and Ontario Provincial Governments for the connecting of the two provinces by a national highway. The road will enter Manitoba at a point between West Hawk and Falcon Lakes at or near Mile Post 24, on what is called the south route.

## Do you discriminate at the dining table—or are you thoughtless?

In thousands of homes, a "line" is drawn at the breakfast table. Tea or coffee is served for "grown-ups" and Postum for children. But some parents do not discriminate. Tannin and caffeine, the injurious contents of tea and coffee, seriously retard the development of the delicate nerve tissues in children.

Consequently, instead of rich, satisfying Postum, children are over stimulated by the drugs in tea and coffee; and so may grow up irritable and nervous. Any doctor can tell you that this is a great evil and should be corrected.

Although some parents feel a certain justification for the parental indulgence in tea or coffee, yet the harm to them may be equally serious. It may take a little while longer for the drugs in tea and coffee to affect

## A Detector Of Carelessness

Machine Registers Bumps and Knocks Given to Freight In Transit.

Rough handling of freight in railway yards or in transit gives rise to many claims by shippers. In some districts this cause is reckoned as producing from 25 to 30 per cent. of all claims for damages. Railroad managers have wrestled with the problem, which is difficult because it is so hard to trace the carelessness to any one train crew.

Now, however, an instrument has been devised to detect the time and place of damage done to moving freight. It is called an "impact register," and has been made the subject of exhaustive tests by the Chicago, Milwaukee and St. Paul Railroad. The machine is constructed on the principle of the seismograph, and when placed in a box car will record the time of each shock and also the intensity. By this means the management is able to prove exactly when and where, for example, the reckless switching of freight cars was done.

Our morals may not be improving, but our skill in inventing methods to expose bad manners certainly shows no signs of flagging.—The New York Times.

## His Flesh Horribly Burnt

His Druggist sold him a cheap Acid Corn remedy, instead of giving him good old reliable Putnam's Corn Extract which has been for fifty years the Standard remover of corns and warts. Putnam's never fails, it is always a success. 25c everywhere. Refuse a substitute.

## Oldest Bell In

Western World

Taken From Spanish Monastery Bears Date 803 A.D.

The oldest bell in North America—or in either of the Americas—is in the rectory of the small village of East Haddam, Conn., which stands a few yards from the famous schoolhouse of Nathan Hale. The bell bears the date, "A.D. 803," and it is believed it was taken from an ancient Spanish monastery. The bell probably came to America as part of a ship's ballast, or as junk. At any rate, this particular bell was purchased from a junkyard and presented to the church. The age of the bell, however, is doubtful. It is of bronze, and of a greenish color. It is not cracked, and will still resound when struck, but it is not now used. There is little doubt, however, that this bell is the oldest in this continent, and that it was the first bell to ring over the waters of the new world from the belfry of one of the first churches built on these shores.

The Friend of All Sufferers.—Dr. Thomas' Eucalypti is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it by stilling suffering everywhere. It is a liniment that has the blessing of lull a continent. It is on sale everywhere and can be found wherever enquired for.

There is said to be a shooting fish with a hollow, cylindrical beak. When it sees a fly on plants that grow in shallow streams it ejects a single drop of water, which knocks the fly into the tide.

## The Last Link With Franklin

Reminiscences of Gallant Seaman Who Braved Arctic Perils.

The other day at Hull, there died at the great age of ninety-seven a captain, Richard Tether, who was the last link with those active Arctic expeditions in search of the remains of Franklin's party, every searching expedition bringing reports of importance to geographical science. Tether's death is the occasion of a looking backward to the search for a northwest passage to the Pacific, especially to Sir John Franklin's last expedition and to the expeditions for his relief, and later for the purpose of discovering what happened to the "Erebus" and the "Terror" and their gallant passengers.

Franklin is an arctic hero of a singularly heroic maritime age and his name is associated with Canada's northland on two counts. In 1819, on his first overland journey from Hudson's Bay to the mouth of the Coppermine River, he wintered on the Saskatchewan. And it was at Cumberland House that he taught the lad, William Kennedy, psalms and hymns, and lent him with aspirations that bore fruit long after. On the expedition, which covered two years, he returned by the Barren Ground. In the years 1825-1827, he made a second overland journey, or inland voyage as the term is now. Both expeditions' fruitful in discovery, were well rewarded by the nation. Between 1829 and 1845 when he sailed on the last fateful voyage, Franklin won distinction in the Mediterranean and in the South Seas, but he was ready and eager for the new adventure by Arctic ice and water, and when the First Lord of the Admiralty reminded him that he was sixty years old, the explorer replied: "No, no, my lord, only fifty-nine." Though the whole expedition was to end tragically, the evidence is that the noble adventurer saw the northwest passage though he never entered it.

Between 1847 and 1857 some fortynine expeditions sailed in search of the "Erebus" and the "Terror," many of them financed by voluntary contributions. Last Franklin's expedition was the last. In 1858, the schooner "Albatross," commanded by Captain Kennedy, with Lieut. Bellot, of the French navy as second, was Lady Franklin's private venture; and it was the "Prince Albert" that brought home the first traces of the missing ships, consisting of scattered articles found on Beechey Island by the captain of another ship. The notable geographical discoveries made by the "Prince Albert" were Bellot Straits and the northernmost point of land in North America which navigators had been seeking for centuries.

Captain Kennedy, who was born at Fort Cumberland, returned to the Northwest and spent the last forty years of his life at St. Andrew's on the Red River. A few years ago, the women's Canadian Club placed a tablet to his memory in the old stone church at St. Andrew's, built in 1848. The tablet was unveiled by Sir Ernest Shackleton. Like Captain Kennedy, Richard Tether was a volunteer, but in a later searching expedition he had been an able seaman and had spent boyhood and manhood in northern waters. Like Captain Kennedy, he "slipped his anchor," but not at sea. Such men, says his memorial in a London journal, "are the salt of our race." We had abundant proof of that salt, as great proof as all his story affords, during the war. It is a gallant race, the sea-faring race, and it has put dynamic into the very word, sea. A little word of three letters—a word that thrills today as it thrilled in the years when they pronounced it as we pronounce "sail." And while the word thrills seamen or landmen, the race will never lack salt.—Free Press.

A Queer Language. A Frenchman learning English said to his tutor: "English is a queer language. What does this sentence mean: 'Should Mr. Noble, who sits for this constituency, consent to stand again and run he will in all probability have a walkover?'"

The Jewels Of Watches Sapphires Generally Used on Account Of Hardness and Reasonable Price.

The principal reason for the deterioration of any piece of machinery is because the constant friction wears away the moving parts and interferes with the regularity of the mechanism. Watches are generally equipped with seven, fifteen, seventeen, eighteen, twenty-one or twenty-three jewels, the fifteen and seventeen jewel types being the most popular. Intrinsically, the jewels are of little value, but from the standpoint of service and the specific purpose which they serve they are invaluable. The jewels usually used in watchmaking are the hardest of the precious stones, diamonds, sapphires and rubies, and the most generally used is the sapphire, which combines hardness with comparatively reasonable price.

## LOST 29 POUNDS DYSENTERY WAS THE CAUSE

Dysentery is one of the worst forms of bowel complaint, and hardly any other disease so quickly undermines the strength and brings about a condition of prostration and utter collapse that often terminate fatally. To check the unnatural discharge without bringing on constipation you should use that grand old remedy with a reputation extending of 76 years,

## DR. FOWLER'S EXTRACT OF WILD STRAWBERRY

Mr. G. H. McVagh, Mavor, Sask., writes:—"About eight years ago I had a severe attack of dysentery. I was sick for three weeks. I weighed 154 lbs. when I took sick and 125 when I got it stopped. I think I tried every medicine on the market, but did not find relief until I used Dr. Fowler's Extract of Wild Strawberry, and one bottle did it. I think there is nothing like it for diarrhoea or dysentery. I always keep some on hand as a person does not know when he will need it." Price 50c a bottle; put up only by The T. Millburn Co., Limited, Toronto, Ont.

## Silver in the Yukon.

The Geological Survey of Canada has just published a report by W. E. Cockfield on the Mayo district, Yukon Territory, in which argentiferous galena veins are being mined. The galena assays from 200 to 500 ounces of silver per ton, and in places runs as high as 2,000 ounces.

Many a man's popularity is due to the fact that he isn't aware of it.

Fresh Supplies in Demand.—Wherever Dr. Thomas' Eucalypti Oil has been introduced, increased supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No man in west Canada, it may be found its potency is never impaired. It is put up in most portable shape in bottles and can be carried without fear of breakage.

## Gluten Flour

Its Uses and Characteristics Explained in Government Bulletin.

Nearly all of the so-called gluten flours offered to the public are not made from gluten. Such is the frank statement made by Dr. C. E. Saunders, the Dominion Cerealizer, in a bulletin entitled "Wheat, Flour and Bread," recently issued by the Experimental Farms Branch at Ottawa. The named used, says Dr. Saunders, is entirely misleading, as these flours often contain a high percentage of starch and are quite unsuitable for diabetic patients. As a rule the gluten flours offered for sale are practically identical with the whole wheat and graham flours. Genuine gluten flour, which is made by washing the starch out of wheat flour and then drying and grinding, is extremely expensive. Gluten bread has no resemblance to ordinary bread and as a substitute for such is an impossibility. Rather less than 50 per cent. of genuine gluten flour can be mixed with ordinary flour, and bread of medium quality be made. Gluten flour can also be used in the production of cakes, biscuits and other products provided it be mixed with ordinary flour, fine shorts or ground nuts, together with eggs, milk, baking powder, etc. There is, however, no possibility of producing any form of palatable bread, biscuit or cake with a very large proportion of pure gluten flour. Dr. Saunders suggests that physicians would be well advised to take cognizance of these facts and not to expect their patients to purchase what is unobtainable or to eat what is inedible. The bulletin, it might be remarked, goes thoroughly into its subject, treating it in all its phases.

A Queer Language. A Frenchman learning English said to his tutor: "English is a queer language. What does this sentence mean: 'Should Mr. Noble, who sits for this constituency, consent to stand again and run he will in all probability have a walkover?'"

The cheapness of Mother Graves' Worm Expeller puts it within reach of all, and it can be got at any druggist's.

Experience begets wisdom—but usually too late in the game to be of any value.

It makes a difference whether people say things or do them.

Every dog has his day—and the watchdog also has his night.

Unless a man has horse sense he is apt to make a donkey of himself.

Minaid's Liniment used by Physicians

W. N. U. 1384

## Embroidery Adorns A Navy Serge Coat

By Marie Belmont.

The loose-sleeved coat is an admirable addition to the wardrobe of the well-dressed woman. This model is cut from a very fine piece of navy blue serge. It shows the dropped armhole which insures comfort as well as preventing the crushing of the filmy frock. The bell-shaped sleeves are finished with a deep stretch of embroidery which reveals both Copenhagen and tan silks. The lower part of the wrap is similarly adorned. Oblong buttons make a distinctive fastening, while the high collar emphasizes a new style note for Fall. The felt hat shows a feather trimming.

The district visitor in a congested section of the city asked one of the little girls, "Are all these children your brothers and sisters?" "Yes, mum," replied the youngster. "What is the biggest one's name?" queried the visitor. "Maxie, mum." "And the name of the smallest one?" continued the lady. "Minnie, mum."—Buffalo Commercial.

A woman's brain reaches its greatest weight at about the age of 26.

## FOR STIFF NECK AND SORE THROAT

Immediate relief comes from rubbing Nerviline over the chest and lower part of the neck. Rub in deeply—lots of rubbing helps. Nerviline reaches the congested parts at once, relieves tightness, takes out the soreness. A bottle of Nerviline in the home relieves a hundred ills, internal and external. Used for nearly half a century as a general household remedy. Large bottles 35c at all dealers.

Bumper Apple Crop. The most recent reports received by the Provincial Department of Agriculture from the fruit districts of British Columbia state that the apple crop will be 100 per cent. greater this year than last year. The crop will require, it is estimated, 5,000 freight cars to take care of the exports.

## What One of the Best Known Travellers in Canada Says

"Now I am going to give you an unqualified testimonial, as they say in the patent medicine advertising. Hereafter I have had a profound contempt for patent medicines, particularly so-called liniments. Perhaps this is due to the reason that I have been blessed with a sturdy constitution, and have never been ill a day in my life. One day last fall after a hard day's tramp in the snow of Montreal, I developed a severe pain in my legs and, of course, like a man who has never had anything wrong with him physically, I complained, rather hysterically. The good little wife says: 'I will rub them with some ointment.' 'Go ahead,' I said, just to humor her. 'Well, it does come with a bottle of 'Minaid's Liniment' and go buy. Believe me the pain disappeared a few minutes, after, and you can tell the world I said so." (Signed) FRANK E. JOHNS, Montreal.

At one period in Holland there was a ban on the sale of oranges and carrots. The reason was the hostile feeling toward the Statholder's family, whose favorite color was orange.

Worms are encouraged by morbid conditions of the stomach and bowels, and so subsist. Miller's Worm Powders will alter these conditions almost immediately and will sweep the worms away. No destructive parasite can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine most beneficial to the young constitution.

High-grade fountain pens are tested by an instrument called a micrometer. If one piece of the mechanism is out of a six-hundredth part of an inch the micrometer rejects it as faulty.

Keep Minaid's Liniment in the house

## Miss Ella Johnson Tells How Cuticura Healed Pimples

"My trouble began as small pimples and in a few months they got worse and my forehead was just a mass of large pimples. They were hard and red and caused me to scratch, and I was disgusted for the time. They made me embarrassed when out in company. I tried various teas but it was of no help. I saw Cuticura Soap and Ointment advertised and sent for a free sample. After using them I bought more, and when I had used one cake of Cuticura Soap and one box of Cuticura Ointment for about a month I was completely healed." (Signed) Miss Ella May Johnson, Box 65, Canaan, Idaho, March 9, 1920. Cuticura Soap, Ointment and Talcum powder maintain skin purity, skin comfort and skin health when used all else fails. Soap, 25c; Ointment, 25c; Talcum, 25c. Sold throughout the Dominion. Canadian Agents, Limited, 24-26, St. Patrick Street, Montreal. Cuticura Soap shavers without soap.

## Alberta May Have Oil Boom

British Trade Commissioner, Montreal, Receives Detailed Report.

That there may be an oil boom in this country of unprecedented proportions is the conclusion of a detailed report on oil operations in Alberta and the North-West Territories received by Capt. E. J. Edwards, senior British trade commissioner, Montreal, from the Winnipeg branch.

The operations of the Imperial Oil Company take the major part in the report, and the conclusion is that "there is little doubt that the arrival of further important news from the north at the end of the present summer and the finding of more oil within the province of Alberta will be the signal for an oil boom of unprecedented magnitude."

## SUMMER HEAT HARD ON BABY

No season of the year is so dangerous to the life of little ones as the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand the baby may be beyond all human help before the mother realizes the danger. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. "Any one of these troubles may prove deadly if not properly treated. During the summer the mother's best friend is Baby's Own Tablets. They soothe the bowels, sweeten the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Safety First. Pop.—I heard something about you today. Billie—It's not true, Pop. I never did such a thing in my life.—Houston Post.

The word "reverend" only occurs once in the Old Testament.

No substance that refuses to dissolve in water has an odor.

Send a Dominion Express Money Order. Five dollars costs three cents.

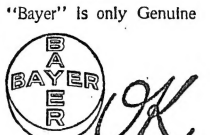

## Cook's Cotton Root Compound

A safe, reliable, regulating medicine. Sold in three sizes. 10c, 25c, 50c. 10c size, 10c per box. 25c size, 25c per box. 50c size, 50c per box. Get your supply of this valuable medicine at your druggist or by mail from THE COOK MEDICINE CO., TORONTO, ONT. (Solely Wholesale).

BOOK ON DOO DISEASES and How to Feed Malicious Pigs to any Address by H. CLAY GLOVER, CO., INC., 118 West 34th Street, New York, U.S.A.

## ASPIRIN

"Bayer" is only Genuine

Warnings! It's criminal to take a chance on any substitute for genuine "Bayer" Tablets of Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Unless you see the name "Bayer" on the package or on tablets you are not getting Aspirin at all. In every Bayer package are directions for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and Pain. Handy tin boxes of twelve tablets cost few cents. Druggists also sell larger packages. Made in Canada. Aspirin is the trade mark (registered in Canada), of Bayer Manufacture of Monosaccharides of Salicylic Acid.

Postum for Health "There's a Reason"

## Camping

The Hornets Trail Rangers Group Blood Indian held a very successful camping week at Blue Bird camp, Hallams Lease, Red Deer river. The trip of 20 miles was made by saddle horses, the provisions being brought by democrat. Regular camp duties were carried out, horse pickets being posted during the nights. C. S. E. T. tests were carried out and many qualified for badges. Two features of the camp were the morning swims and the evening camp fires on the silver strand of the swift flowing river.

The greatest prize of the camp was the bare-handed capture of two very much alive hornet's nests, which hang in the club room of the group as their symbol and mascot. Coyotes and antelopes were regular visitors at the camp. Only two horses escaped from their pickets, but the erstwhile cowpuncher soon recaptured one, the other turned up at his home 20 miles away three days later.

Lasting impressions were made by the various experiences of camp life, which has now been assured as an annual event.

During the last week many folks have made the long trek to the Red Deer river and have brought home bushels of red ripe bull-berries.

After a spirited contest elections of the Hornets Trail Rangers Group have returned the following executive: G. C. Neil Sager; S. C. Douglas Wheeler; Tally, Lloyd Sager; Cache, Edward Berry. The programme for the winter is now being planned.

Threshing operation have just started in the Blood Indian and Northampton districts. Bert Thompson and Ira Barton both started on their respective routes on Monday.

Nine children were baptized in the south circuit of Big Stone last Sunday.

Rev. R. Cumming and Mr. E. Ellis from Coliholme attended District meeting in Chinook last Tuesday.

## Methodist Church District Meeting

The Financial District meeting of the Youngstown District convened at Chinook on Tuesday. Twelve ministerial and three lay representatives coming from the various Circuits which reach from the Saskatchewan boundary to Youngstown. The morning session was occupied largely by the financial reports from the various circuits. These revealed the splendid spirit of our people toward the support of their church and ministers. In spite of the succession of dry years which have visited this district and the loss from hail. The various Church Boards, with but one exception, have resolved to pay in full their minister's salary and other expenses of the church for the year. We regret to have to report that Chinook is the exception above mentioned.

In the afternoon session plans were chorused for co-operative work throughout the district in Sunday School and evangelistic work. It was decided that another District meeting should be called later in the fall at which this Sunday school and evangelistic work will be organized and set on foot for the winter and spring months.

In the evening a public meeting was held at which Rev. Wiggins of Oyen took the chair. Rev. Thos. Powell gave an interesting address taking for his text "And when He saw the multitude, He was moved with compassion." Mr. Powell said men and women now a days are moved by different passions as they survey the crowd. Some see in the crowds just so many individuals out of whom they wish to make money. Others see just a crowd of voters whose vote they wish to secure. But Christ saw the crowd and was moved with compassion for He saw their need. Mr. Powell closed with the thought that ministers when impressing on the minds of their hearers their need of Christ, sometimes forget the all important fact that Christ needs them as much as they need Him. For unless the men and women of any town every one of them give themselves to Christ and allow Him to work through them Christ cannot do what He would for that town.

## Duck Shooting Notes

By Nimrod

It is believed that if one of the hardware stores would stock a machine gun it could be easily sold to Jim Rennie as his pump gun does not work fast enough.

Shooter Smith soots the ducks! Did you ever see a bird crawl?

A little fellow with a Chinese name was caught sneaking up on some mud hens.

Hide, Hyde, floggers can't hide on hyde!

Wylie says, "did you see me pick that mallard out of that bunch of tiel?"

The Banner Hardware was advertising their classy shells sending Roger out.—Bill you had better go next time you want to sell shells!

Pressure of business kept Daniel, the rabbit king, home Monday.

No wonder the bunch Bob took were in luck. They let the joker run wild.

Ten Per Cent was only picking out the big ones,—once in awhile

Bird! Bird! They say he is a crack shot.

## Two Nominated For Councillor

At a meeting of the electors of the Village of Chinook held last Tuesday for the purpose of nominating a candidate for councillor for the Village two of our well-known citizens were nominated, Mr. A. McAlister and Mr. S. H. Smith. Owing to two aspirants for the position an election will be held next Tuesday evening, Sept. 13, between the hours of 8 and 10 p.m. Be sure to turn out and vote.
